OUR PROFILE

Dasteri is an innovative automotive lighting manufacturer located in Alexandroupoli, Northern Greece.

By constantly investing in highly qualified staff and new technology Dasteri is, today, one of the most recognizable and trustworthy European companies in the automotive lighting market with sales and distribution points in more than 50 countries around the world.

— Vertically Integrated Production

Dasteri products are manufactured in two privately-owned, self-sufficient production facilities of 15.500 square meters. Our company's production capabilities include the following:

R&D Department

Dasteri's R&D department, manned with highly trained and experienced employees as well as equipped with the latest design and simulation software enables the best possible research for solutions, new ideas, materials, designs and production processes for the ever changing market requirements. From mechanical design with advanced CAD/CAM software and optic validation with Optis to tool and mold flow validation the R&D department is capable to develop projects that result in items of the highest design quality.

Tooling Department

Dasteri's tooling department is fully equipped with the most advanced CNC machinery thus providing a great advantage in terms of lead times for new projects as well as ensures the best possible maintenance of the tools. The fact that at the moment Dasteri possesses more than 2.000 molds that have been produced inhouse reflects the experience of the company on this field.

Production Department

Dasteri's vertical production consists of various advanced machinery such as metallization, ultrasonic, stamping etc. for which experienced operators ensure the proper function and output. Equipped with multiple injection molding machines and staffed with highly trained and experienced employees with average work experience of 19 years Dasteri is able to meet the ever growing demand of its products with a timely manner.

Quality Assurance Department

Dasteri's products are manufactured according to the specifications of the ISO 9001:2015, ISO 45001:2018, ISO 14001:2015 and IATF 16949:2016 standards and fully meet the requirements of European and International regulations. The performance of the products is tested in Dasteri's inhouse photometric laboratory and statistically analyzed. Apart from regular water, dust, vibration & climatic tests, periodical colorimetric and electromagnetic tests take place to ensure the absolute continuity of the products. Extensive testing is being performed throughout the production process to validate the critical aspects of the produced items. An item is being released from the factory only when it ticks all the boxes regarding quality.

— Customer Centered Philosophy

All Dasteri employees not only work to ensure that the products will reach the customer in a timely and exact manner, but they remain at customers' disposal for any after sales assistance they may need thus giving them service of the highest quality to satisfy their requirements and meet or even exceed their expectations.
